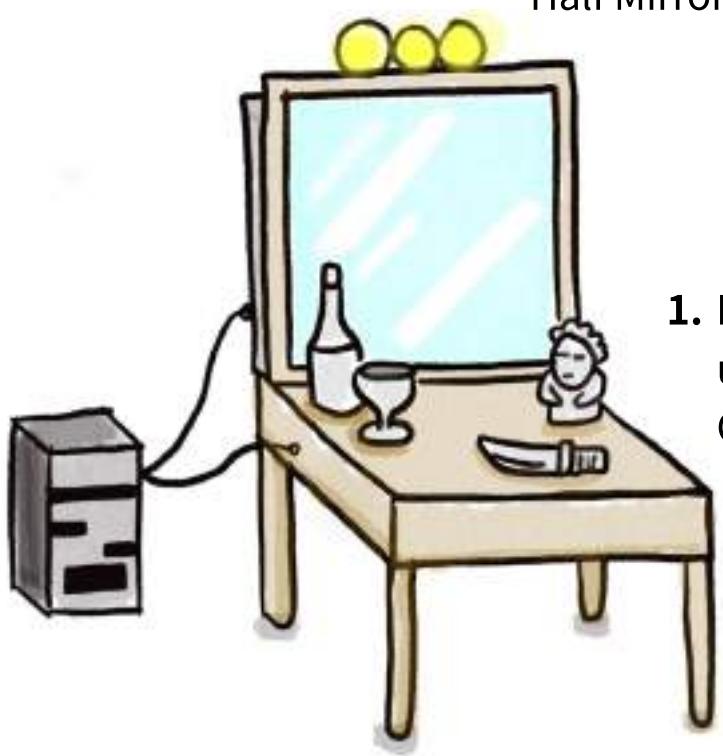
Concept

A mirror that transforms your reflection to a different identity:

1. Real-time morphing and sync with the user to provide realistic experience
2. Intuitive interaction to discover different identities to morph to

System Sketch

2. **Display Module**
   switch between mirror and display
   Half Mirror /Display(Monitor) / LED Lights / Camera



1. **Interaction Module**
   user input recognition
   Conductive Artifact / Arduino / MPR 1221

3. **Software Module:**
   morph image based on user input and camera input
   - DeepFakeLive / Display Manager / Arduino IDE
